

### **FALL FY-13 FTS YG LIMITATIONS MATRIX – “FTS Community Vacancies”**

The limitations listed below are the maximum number of officers, by Year Group (YG), that may be accepted into each FTS officer community from all sources (AC & SELRES) based upon community inventories. These numbers **do not** represent the total number that will actually be selected at this board. For applicants, the importance of this table rests in verifying a vacancy exists in your YG. **Applications for a particular community will not be accepted from officers whose YG column has a “0” in it.** For example, and as long as all other eligibility criteria are met, an officer from YG02 is eligible to apply for FTS Aviation but not for FTS EOD.

### **FALL FY-13 AC OCM YG LIMITATIONS MATRIX – “AC OCMs can support to lose”**

The Active Component (AC) OCMs' restrictions listed below apply only to AC applicants. **These numbers represent the maximum number allowed to be selected from each AC community by YG**, not necessarily the number that will be selected. Again, the importance of this table is to verify a “0” does not exist in the square associated with the applicant's YG and AC community. **NOTE: All AC applications will be reviewed/released by the applicable AC OCM before being considered by the FTS Redesignation Board.**
